### Note:

We can supply PCB kits that are fully etched and drilled, but it is probably more educational to provide a PCB that is merely silk-screened with etch resist. Then the students can have the experience and satisfaction of etching and drilling their own boards to learn first hand how it's done.

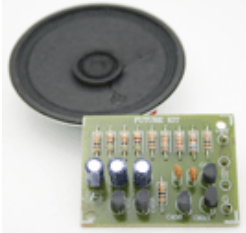

So in one step, the kits can be made not only *cheaper* (by saving the cost of etching and drilling), but more educational as well.

Plain Boards are available above kits only.

### AVAILABLE DRILLED / ETCHED ONLY
